Single Document Translation

This solution gives you the option to translate documents to your chosen language.

This is achieved through the Translator Pro app where you select single document translation option.

Here you attach the file you want to translate as well as: the name of the translated file, file type and the language you wish to translate to.

Upon completing the translation, you will be given the option to download said file as well, as the option to go back and use another one of our options.

The screenshot shows a web interface titled "Select your document for translation". It features a large text area for the document, a "File name:" input field, a "File type:" dropdown menu, and a "Translation language:" dropdown menu. At the bottom, there are "Reset" and "Translate" buttons.

Select your document for translation

Batch Document Translation

This solution gives you the option to translate documents to your chosen language.

This can be done on up to 15 documents at once.

Upon opening the app, you will need to select the batch documents translation option and attach the files you wish to translate as well as the language you wish to translate to. Upon completion you will be given the option to open each individual translated document and an option to go back to translate more document

After translating you will be given the option to download, folders will be created in your OneDrive to organize your translated documents.

The screenshot shows a web interface titled "Select your documents for translation". It features a section labeled "Document for translation:" which contains a large rectangular area with the text "Add files to get started..." and a link "Attach file" with a paperclip icon. Below this, there is a dropdown menu labeled "Translated language (select):" with a downward arrow. At the bottom right, there are two buttons: "Reset" and "Translate".

SharePoint Translation (in preview)

This solution gives you the option to translate a SharePoint Folder to your chosen language, be aware this option is currently in preview and may change up to release.

This can be done on up to 10 documents at once.

Upon opening the app, you will need to select the SharePoint translation option and enter the SharePoint URL and library name you wish to translate as well, as the language you wish to translate to. Upon completion you will be given the option to open each individual translated document and an option to go back to translate more documents.

After translating you will be given the option to download, folders will be created in your OneDrive to organize your translated documents.

Enter your SharePoint URL for translation (in preview)

SharePoint URL:

Library Name (max 10 files):

Translated language (select):

Speech Translation

This solution gives you the option to translate audio files to your chosen language.

This is done through the Translator Pro app and selecting the speech translation option.

Here you attach the audio file you wish to translate and click transcribe. After the audio file has been transcribed you can fix any errors you see in the text box, and then you select the language you wish to translate to and click translate. The translated text will be displayed in the textbox on the right of the screen.
